EDUCATION

Wuhan Textile University, China

[Sep 2018 - Jun 2020]

M.Eng. Mechanical Engineering

GPA: 3.69 / 4.00

Field Of Study: Machine Learning & Automation

Thesis: Image features detection and matching with Python.

Courses: Computer Controlling Technology — Software Engineering & Object-Oriented Programming

Alexandria University, Egypt

[Sep 2011 - Jun 2018]

B.Sc. Mechanical & Textile Engineering

GPA: 2.28 / 4.00

Volunteering: Co-founder of [Start Menu Union \(SMU\)](#) organization — Team Leader in [Rowad](#)

EXPERIENCE

• [TreviPay](#)

[Sep 2022 - Present]

→ Software Engineer III

- **Single Sign-on via SAML:** Co-designed and implemented a dynamic SSO user group setup to enable access control across multiple networks (US, AU, MX) in the PACCAR system. I created a PL/SQL script to generate user groups and entities, configure business-line conditions, and populate entity values. I also troubleshoot and optimized the SSO linking/unlinking logic to ensure integrity across identity provider changes. This contribution enhanced flexibility in managing user access based on network and business roles.
- **MultiDoc Upload Project** Co-designed & co-implemented a system allowing dealers to upload original PDF invoices, converting and saving them as EPS images. I wrote the code to read, convert, and save uploaded images using Perl and Ghost scripts. This project significantly improved our customers' experience & our system credibility by enabling comparisons between original invoices and e-invoices.
- **Technical Skills:** Perl — Ruby on Rails — Oracle SQL — PL/SQL — Docker — Kubernetes — AWS

• [Knowledge Officer LTD](#)

[Sep 2021 - Aug 2022]

→ Software Engineer

- **Admin Portal Development** As a key player, I co-developed the Admin portal using React TS. This portal is essential for managing and controlling all elements of the learning process. My responsibilities included adding and (de)activating mentors and cohorts, controlling topic assignments, generating customer certificates, and managing user accessibility to the platform. My work significantly enhanced the efficiency of the KO team and directly improved the customer experience.
- **KO Reservation System Development** Co-developed and co-designed the KO reservation system to replace Calendly, reducing integration costs and overcoming its limitations. This new system met stakeholder goals and enhanced user experience by automatically adding reservations to their calendars.
- **Technical Skills:** React TS — Ruby on Rails — PostgreSQL

• [Sayegh Company](#), Educational Research Center

[Mar 2020 - Jun 2021]

→ Full Stack Web Developer

- Digital Books Development for [Pearson](#): Co-developed interactive and responsive digital books for Pearson, including titles such as [GoGetter](#) & [Big English](#). These digital readers feature interactive activities designed to enhance the learning experience for users.
- **Technical Skills:** HTML — CSS — JavaScript — NodeJS

ON-LINE COURSEWORK

- [Stanford University](#): Divide & Conquer, Sorting & Searching, and Randomized Algorithms ([certificate](#))
- [Harvardx CS50](#): Introduction to Computer Science ([certificate](#))
- [University of London](#): Mathematics for Computer Science ([certificate](#))
- [Route IT](#): 8 Months Intensive Full Stack Web Development Diploma (Cycle-33) ([certificate](#))
- [AlMakinah](#): Introduction to Programming Using JavaScript ([certificate](#))
- [MITx 6.00.1x](#): Introduction to Computer Science and Programming Using Python ([certificate](#))

PUBLICATIONS

- Computer software copyright [certificate](#) from [China Copyright Protection Center](#).

[2019]
